

The Call to Remember

VIDEO NOW AVAILABLE! Last September we announced the television premier of *The Eastland Disaster*. Whether or not you saw the television broadcast, you now have the opportunity to purchase this program to add to your personal movie/video library. This one-hour installment of *Chicago Stories* features underwater reenactment footage, photos taken shortly after the ship rolled over, and several interviews with people whose families were affected by the tragedy.

The Eastland Disaster was written and produced by WTTW's *Wild Chicago* producer Harvey Moshman and former WGN reporter Chuck Coppola. Harvey and Chuck initiated the idea for this undertaking because, in their own words, "*Although we may never be able to answer why such a compelling story like the Eastland Disaster has been relegated to near obscurity, we feel that Chicago's worst tragedy has gone overlooked and underreported long enough.*"
